Anparasanesan Tharmarajah

Senior Full-Stack Developer | Laravel, Vue.js, React, Python

Dudley, West Midlands, UK | 07928 939105 | anparasanesan@gmail.com | linkedin.com/in/anparasanesan
Right to work: full UK work rights, no sponsorship required

Professional Summary

Senior Full-Stack Developer with 9 years building e-commerce, e-learning and booking platforms for clients in the UK, Germany, the US and Sri Lanka. Built an airport parking system that still handles 1,000+ bookings a month, led a team of 7 developers across 15+ projects, and cut page load times from 4s to 1.8s. Since 2025, has delivered 10 freelance projects, including three business systems with built-in machine learning and AI features. Pairs this with SEO and paid-acquisition skills (a 355% conversion lift) and an MSc in Computer Science from University College Birmingham.

Technical Skills

Languages: PHP, JavaScript, TypeScript, Python, SQL, HTML5, CSS3
Frameworks: Laravel, Yii2, Vue.js, React, Inertia.js, Next.js, NestJS, Electron, Filament, WordPress, WooCommerce, Tailwind CSS, Bootstrap, Ionic
Databases: MySQL, PostgreSQL, MS SQL, Redis, Firebase
Cloud and DevOps: AWS (EC2, S3), VPS hosting, Docker, Git, GitHub, GitLab, Apache, Nginx, cPanel/WHM, DNS and SSL
Machine learning: Python, scikit-learn, LightGBM, SHAP, pandas, FastAPI, Flask, OpenCV, Streamlit, NLP, predictive modelling, LLM integration (Claude API, OpenAI API)
Practices and tools: Agile/Scrum, code review, Git feature-branch workflow, staging and production environments, MVC, REST APIs, Stripe, Jira, Asana, Teamwork
SEO and growth: technical and on-page SEO, keyword research, Google Analytics, Search Console, Google Tag Manager, Google Ads, YouTube Ads, Meta Ads, retargeting, Mailchimp

Professional Experience

Freelance Full-Stack Developer — Jan 2025 – Present

Self-employed, UK

- Delivered 10 client projects (7 websites, 3 business systems) across e-commerce, education, hospitality and travel, including Hook and Line Sidcup, Fish and Chips Sidcup and My Learning Point, a UK education provider.
- Built a multi-tenant student management platform (Laravel, React and TypeScript with Inertia.js, PostgreSQL, Redis) with role-based access, real-time dashboards, Stripe payments and bulk data exports.
- Added a Python and FastAPI machine learning service to the platform that pinpoints each student's weak topics, recommends personalised study actions and shows teachers where to adjust their teaching (scikit-learn, SHAP, Claude API).
- Built a cross-platform point-of-sale system (Electron, React, NestJS, PostgreSQL) with receipt printer and barcode scanner integration, plus a LightGBM forecasting service that uses weather, local events, promotions and market trends to suggest how to sell near-expiry stock before it goes to waste.
- Built a tours and travel booking platform (Next.js, TypeScript, Laravel API, PostgreSQL) with Stripe checkout and Google Maps features, plus an OpenAI-powered chatbot that answers customer questions and researches destinations online to give agents ready-made suggestions.

Senior Software Engineer (Team Lead) — Mar 2021 – Jan 2025

Koceansoft (Pvt) Ltd, Sri Lanka (part-time, remote from Sep 2023)

- Led a team of 7 developers delivering 15+ projects on schedule for clients in Sri Lanka and the US, including the MyKings.lk electronics store and an LMS for AIBT, running Agile/Scrum sprints in Jira from requirements to sign-off.
- Grew a client's visitor-to-paid conversion rate by 355% within 12 months by designing and optimising retargeting campaigns on Facebook and Google Ads.
- Cut page load times from 4s to 1.8s by moving front ends to lightweight Vue.js components and leaner Bootstrap layouts, and standardised MVC architecture in Laravel for consistent, maintainable code.
- Introduced a structured delivery workflow of Git feature branches, peer code reviews and separate staging environments, ending direct edits to production and making every release traceable and easy to roll back.
- Took client websites to first-page Google rankings for priority keywords through keyword research, technical SEO and content optimisation.
- Managed 3 production servers (VPS and AWS EC2) hosting 17 client sites, handling deployments, Apache and Nginx configuration, DNS and SSL.

Software Developer
Apr 2019 – Mar 2021

Prograva (Pvt) Ltd, Germany (Remote)

- Built an airport parking booking platform from scratch for a German operator, with online booking, slot allocation, live availability and payment gateway integration. Still live across four brands (ich-parke-selber.de, parkairport.de, parkkoenig.de, primus-parken.de), handling 1,000+ bookings a month.
- Led the team's move from Yii2 to Laravel and Vue.js, auditing the legacy system for weak points and proposing the improvements built into the new version.
- Developed the new platform's booking module, customer dashboard and Stripe payment system, with REST APIs on MS SQL, code in GitLab and delivery tracked in Asana.

Senior Web Developer
Jul 2016 – Jan 2019

Global Edulink (UK-based), Battaramulla, Sri Lanka

- Managed a team of 4, planning timelines, costs and resources in Teamwork, to design, build and run six UK e-learning platforms (Global Edulink, 1Training, South London College, Study365, Studyfolk and Studyfolk Exams), which together generated around £85K in monthly sales.
- Worked daily with the UK managing director, tutors and operations staff, turning their requirements into platform features.
- Built core learning management features in PHP, Laravel and WordPress, including course delivery, online payments, automated certification and email and marketing integrations, supporting 10–15 new enrolments a day.
- Launched cross-platform Ionic mobile apps that reached 1,000+ student downloads within 3 months.
- Owned SEO and site performance, improving speed, navigation and layouts through regular Google Analytics reviews and guiding the digital marketing team's campaigns to grow organic visibility and course sales.

Education

MSc Computer Science
Sep 2023 – Jan 2025

University College Birmingham, UK

Dissertation on machine learning for lecturer productivity: automated grading, at-risk student prediction and personalised learning.

BSc (Hons) Information Technology
Jan 2014 – Dec 2018

Sri Lanka Institute of Information Technology (SLIIT)

Studied full-time, then part-time from 2016 alongside full-time employment.

Research and Projects

- **Publication:** "Smart Monitor for Tracking Child's Brain Development", 8th International Conference on Educational and Information Technology (ICEIT 2019), ACM, March 2019, DOI 10.1145/3318396.3318401. First-author paper on a mobile app that uses machine learning and gamification to track and support children's cognitive development.
- **MSc dissertation (manuscript in preparation):** "Enhancing Lecturer Productivity in Higher Education through Machine Learning". Built a web-based prototype that applies NLP-based grading and predictive models (regression, decision trees, SVM) to real student data to flag at-risk students early.
- **Facial recognition access control (MSc AI/ML module):** Built a visitor access web app in Python with OpenCV and Streamlit, using Haar Cascade face detection and CNN-based recognition chosen over PCA and LDA after a comparative review. Designed tests covering lighting, pose, expression and occlusion.

Volunteering

Volunteer Lecturer
2022

Yarl IT Hub, Jaffna, Sri Lanka

Delivered lectures to 40+ students on the Uki coding programme.
